1. Prior Variable Analysis and Principal Component Analysis are both examples of a data reduction algorithm.

1 / 1 point

- ☐ True.
☒ False.

✔ **Correct**
Correct. Prior Variable Analysis is not a data reduction algorithm.

2. After the data are appropriately processed, transformed, and stored, what is a good starting point for data mining?

1 / 1 point

- ☐ Machine learning.
☒ Data Visualization.
☐ Non-parametric methods.
☐ Creating a relational database.

✔ **Correct**
Correct.

3. **In-sample forecast** is the process of formally evaluating the predictive capabilities of the models developed using observed data to see how effective the algorithms are in reproducing data.

1 / 1 point

- ☒ True
☐ False

✔ **Correct**
