---

1. You want your project in Cloud Pak for Data to interact with outside tools like Git repository. Which option under Projects will provide you with this capability?   **1 / 1 point**

- ◉ Services & integrations
- ◯ Access control
- ◯ Environments
- ◯ Resource usage

✓ **Correct**
Correct! With this option, you can use third-party Integrations so your project can interact with external tools.

2. After you create an account in Watson Studio, which option should you select to create a project?   **1 / 1 point**

- ◯ Take a tutorial
- ◉ Work with Data
- ◯ Learn what's new
- ◯ Projects

✓ **Correct**
Correct! With this option, you can either create an empty project or create a project from a sample or file.

3. Which option enables part of the Jupyter notebook to not execute?   **1 / 1 point**

- ◯ Code
- ◉ Markdown
- ◯ Job schedule
- ◯ Notification

✓ **Correct**
Correct! You select Markdown to insert the description of the notebook, which is not treated as code.

4. Which option should you select to see the available runtime environments?   **1 / 1 point**

- ◉ Templates
- ◯ Services & integrations
- ◯ Resource usage
- ◯ Access control

✓ **Correct**
Correct! To see the available runtime environments, click Templates on the Environments page.

5. Which option should you select to define the access for personal tokens?   **1 / 1 point**

- ◉ Select scopes > repo
- ◯ Third-party integrations > Connect integration
- ◯ Manage > Service & Integrations
- ◯ Select scopes > personal access token

✓ **Correct**
Correct! To define the access for personal tokens, under Select scopes, select repo.
